TECNOPLUS

High efficiency new pump with energy saving system

High performance multistage horizontal new pump:

Latest technology ESC with constant pressure without fluctuations and low energy cost.

Built in electronic speed regulator.

Easy to install and plug and pump.

Manufactured with non-corrosive materials with thermal cutout and dry running protection.

DRAINEX 400, 500, 600

The most powerful and robust drainage pumps

New range of pumps for sewage, drainage, and grey water in continuous operation.

Robust, powerful and efficient for professional use.

Standard, and explosion proof

motor versions with humidity and thermal

sensor, manufactured to ATEX II 2 G E ex DII B T4 standard. Vortex impeller, pump body and motor housing in cast iron.

MULTINOX, THE PRESSURISATION AT THE BEST EFFICIENCY. Multiple application for potable water in apartments, industry and services

IN LINE monobloc vertical multistage pump, manufactured according to the DIN standard specially to pump potable water. Specially designed for booster sets with high efficiency for multiple applications: for domestic, residential, sport and hospital complexes and irrigation systems. Pump body, top support, sleeve and impellers in st. st. AISI 304.

TIPER 15

The whirlpool of High performance with the minimum dimensions

New pump for hydro massage applications.

Compact with small dimensions. Easy to install in any bath.

Built with total drainage device. Pump body in high resistance thermoplastic.

Built in thermal protection.

AQUABOX

New design for today market's needs

New fully automatic pressurisation set, with tank, pump (surface or submersible), expansion vessel and on/off automatic control.

Specially designed for installations with insufficient incoming mains pressure.

Proven quality overflow and "quick stop" inlet ballfloat valve.

Built with thermal protection. Easy to transport and to install.
